

SUMMARY

I'm a **Software Quality Engineer with 4+ years of experience** in manual and automated testing. I've built automation frameworks from scratch, mentored teammates, and contributed to test strategy and decision-making. I enjoy collaborating with DevOps to integrate automation into CI/CD pipelines and working side-by-side with cross-functional teams to improve reliability and overall product quality.

What I love most about QA is being involved in the creation of software that feels stable, usable, and well-crafted. I'm naturally curious, proactive, and detail-oriented. I like understanding how things work, solving problems, and helping teams grow through better testing practices. I approach my work with ownership, continuous learning, and a strong focus on thoughtful, scalable quality.

EXPERIENCE

QA AUTOMATION ENGINEER

Minder

Jun 2025 - Present

Lead UI and API automation using scalable POM-based frameworks, enforcing clean code practices.

Coordinate with developers and product owners to define testing strategy and quality gates.

Support mobile, performance, and cross-browser testing.

Mentor QA teammates and improve documentation across the team.

Work closely with DevOps to integrate automated tests into CI/CD workflows.

QA AUTOMATION ENGINEER

Allianz

Oct 2024 - Jun 2025 · 10 mos

Developed and maintained UI automation using Java, Selenium, and Cucumber.

Built API tests to ensure smooth integration between frontend and backend services.

Set up Docker-based test environments for parallel test execution.

Worked closely with developers and business analysts to increase test coverage and reduce defects.

Supported CI/CD test automation alongside DevOps engineers.

QA AUTOMATION ENGINEER

Markmonitor

Mar 2023 - Oct 2024 · 1 yr 8 mos

Built and maintained automated tests with Java + Playwright for regression and E2E testing.

Validated APIs using Postman and ensured data integrity through SQL queries.

Contributed to performance testing using JMeter.

Participated in Jenkins pipeline execution reviews and test failure debugging.

Collaborated with international Agile teams in English.

QA ANALYST

Accenture Argentina

Feb 2021 - Jan 2023 · 2 yrs

Participated in Agile ceremonies and helped define test strategies for sprint releases.

Executed manual functional, regression, and integration testing.

Reported bugs, worked closely with developers, and improved product stability.

Trained peers in manual testing techniques and functional analysis, supporting onboarding and team development. Contributed to improving testing processes and documentation.

SKILLS

English Level C1

Programming:

Python, Java, SQL
Selenium, Playwright, TestNG,
Cucumber

Testing Tools:

Postman, JMeter

CI/CD & Containers:

Jenkins, Docker, Kubernetes

Log Management:

Datadog

Project Management:

Jira (Zephyr), Azure DevOps
(TFS)

Version Control:

Git, Bitbucket, GitLab, Github

IDEs:

IntelliJ, VS Code

Operating Systems:

Linux, Windows

EDUCATION

COMPUTER SCIENCE BACHELOR

FCEN - UBA

2021 - Today
